

## *Oil Dyes*

P/N 9U5032

P/N 9U5031

- Highly concentrated oil soluble dyes for adding color to lubricating oils, transmission oils, hydraulic oils and fuels.
- Visible at concentrations of 1 part in 10,000 or more. It only takes (1 oz) to color (125 gal) of light color oil.
- Use it to color code oils to prevent mix-ups.
- Use it to identify the source of leaks when more than one source is possible.

For dark colored oil, use dyes which are visible in black light (ultraviolet)
