

NEW MK4 WITH INCREASED LINE PULL

Proven Two-Drum
Winch Cassis

**DESIGNED
FOR SAFETY**

More Rope
Capacity!
1800 ft

New More
Powerful Motors

70,000+ LBS LINE PULL

at 3:1 Safety Factor

ADVANCED CONTROL SYSTEM

- Remote start and stop of winch machine from tether machine
- New compact, ergonomic screen
- Upgraded control system with camera option
- Enhanced radio system—never work out of signal range

Peterson Cat is your source for sales, support, and service for Tractionline, Harvestline, and Hawkeye forestry products in Northern California, Oregon, and Southwest Washington.

BEST IN CLASS LIVE CONSTANT TENSION

Adjust tension in one-ton increments to reduce loads on stumps during sidewashing, with separate tension controls for inhauling and outhauling.

REVERSED BUCKET

- Right-angle operation – Work at right angles from the boom at full tension
- Unparalleled holding force – Superior to competitors who rely on winch base weight alone

LOWER SWIVELING SHEAVE

- Full-tension chain passage – Chains pass through sheaves under full tension
- Reduced repositioning – Tether machine drives directly to the lower sheave under tension, minimizing winch base moves
- Reduced winch base moves – Operator cuts more trees from one setup
- Reduced sidewashing - Increases line pull and pulling power for slope maneuverability
- Road efficiency – Tether machine leaves and returns to road under tension; only requires partial road width, keeping routes open for other traffic

TRANSIT MODE

- Maintains low tension on lines during movement
- Boom lifts and swings lines over obstacles without disconnecting from tether machine

SAFETY FEATURES

- Dual-line redundancy – Two lines for enhanced safety
- Over 70,000lbs pulling power at 3:1 safety factor
- 230,000 lbs holding capacity when brakes are set
- Designed for one-person operation
- Superior radio and communication systems
- Industry feedback: “Best system out there”

ADDITIONAL TETHER MACHINES

Lowest cost for additional tether machines - Only requires wire harness in additional units
