

WORK TOOL ATTACHMENTS

Total system solutions for any job application

PRODUCTIVITY BOOSTERS

Top-quality, application-matched Cat® Work Tool Attachments are the perfect choices to boost the productivity and versatility of your Cat machines, while also enhancing their resale value. Whether using Smart or conventional attachments, you'll have the application-matched solutions you need to cut or fill, rip or tear, sort or load, dig or lift, move or level, pulverize or crush.

Contact Peterson Cat to learn more about the productivity boosting benefits of Cat Smart and conventional Work Tool Attachments.

LET'S DO THE WORK.™

PETERSON

SMART ATTACHMENTS

SMART DOZER BLADE

Available for Cat 279D3, 289D3, 299D3 and 299D3 XE Series machines, operators can cut, move, fill and grade any material. The blade features a curved moldboard that keeps material rolling and a trapezoidal design with angled end bits that enable operators to flush-cut against vertical surfaces when the blade is fully tilted. The D3 Series host machine recognizes the attachment and unlocks special display screens, enabling the operator to select how the blade is controlled. The standard joystick control functions can be modified to match specific application needs. The ASSIST feature's memory enables operators to recall previously used settings at the touch of a joystick button.

SMART GRADER BLADE

The Cat GB120 and GB124 are available for D3 Series machines, which recognize the D3 host machine and unlocks special display screens that provide options for attachment control, enabling joysticks to be repurposed to activate attachment functions. The right joystick operates blade tilt, angle and lift. The ASSIST feature enables selection of the Cross Slope Left or Right patterns, independent of the machine's operating angle. As the blade is angled and geometry changes, the Smart attachment even calculates and maintains the cross-slope setting.

SMART BACKHOE

The Cat BH130 significantly increases versatility, enabling them to be used in a wider range of tasks, including utility trenching, digging footings, and forming/maintaining drainage ditches. The backhoe is also compatible with Cat 3-ton excavator attachments, and its auxiliary-hydraulic system enables pairing with hydromechanical work tools, including hammers, thumbs, augers, and vibratory compactors. The backhoe hydraulically shifts side-to-side, enabling digging adjacent to buildings and footings, and integrated stabilizers provide a solid digging platform.

WORK TOOL ATTACHMENTS

AUGERS

Augers are designed for drilling holes with the right amount of speed and torque for maximum productivity in many soil types. Cat Augers are for use on Cat Skid Steer Loaders, Compact Track Loaders, Compact Wheel Loaders, Mini Excavators and Backhoe Loaders.

BALE GRABS AND BALE SPEARS

Bale Grabs safely grab, carry and stack baled material without damaging wrapping. Bale Spears are ideal for handling hay bales, both round and square as well as other baled material in agricultural applications.

BLADES

Caterpillar offers a wide variety of blade styles including straight, angled, coal, woodchip, landfill, reclamation and cushion dozer—enhancing the machine's productivity in many different industries and applications. Every Cat Blade is designed to perfectly match the machine's configuration, extending your effective scope of operation.

CAT® CARD

Use your Cat Card on qualifying work tool attachment purchases and get 0% for 12 months.*

The Cat® Card is a flexible, unsecured line of credit used for Cat equipment needs when you don't have all the cash on hand. Think of the Cat Card as a commercial account that allows you to buy what you need now, make low monthly payments, then pay in full when your finances allow.

Use the Cat Card to pay for parts, engines, attachments, repairs, rebuilds, rentals and even protection and service plans — and earn Cat Vantage Points on every qualifying purchase. As a Cat Card holder, you can unlock exclusive financing offers and get personalized service from a dedicated Cat Financial customer service team. Ready to apply? Start the Cat Card credit application today.

BROOMS

Brooms are ideal for sweeping and cleaning dirt, rock, snow and other debris from streets, parking lots, driveways, sidewalks and factory floors. Several sizes and styles are available for Cat Loaders. Water sprinkler kits are available for dust control.

BRUSHCUTTERS

Brushcutters are ideal for clearing brush and saplings from highway medians, utility and pipeline easements and for initial land clearing for housing, parks and recreational areas. Cat® Industrial Brushcutters are well suited for high-production brush cutting for land management projects.

BUCKETS—EXCAVATOR

Caterpillar offers a wide variety and many sizes of excavator buckets including: clean-up, digging, ditch cleaning, ditch cleaning tilt, extreme duty, general duty, grading, heavy duty and severe duty. Consult with the experts at our dealership to ensure selection of the most efficient bucket for your machine and application.

WORK TOOL ATTACHMENTS

BUCKETS—SKID STEER AND COMPACT TRACK LOADER

Cat® buckets are designed to provide superior productivity, high reliability and long wear life in a variety of materials and handling conditions. Rugged Cat buckets include General Purpose, Low Profile, Utility, Light Material, Multi-Purpose, Industrial Performance and Skeleton Buckets.

COLD PLANERS

Cold planers are primarily used to economically restore asphalt and concrete surfaces in small residential and commercial paving jobs. They are also ideal for milling imperfections prior to resurfacing and removing deteriorated pavement when the use of dedicated planers is limited. They are designed for use on Cat Skid Steer Loaders, Compact Track and Wheel Loaders, Backhoe Loaders and Mini Excavators.

COMPACTORS—DRUM

Vibratory drum compactors are used for compacting soil, sand and gravel prior to pouring concrete or laying asphalt surfaces. Vibratory action and dynamic force combine to provide excellent compaction in a compact size. This compactor style is designed for use on Cat Skid Steer Loaders, Compact Track and Wheel Loaders.

COMPACTORS—PLATE

Vibratory Plate Compactors are used for compacting soil, sand and gravel prior to pouring concrete or laying asphalt surfaces. They are also ideal for asphalt patch work. This compactor style is designed for use on Cat Skid Steer Loaders, Compact Track and Wheel Loaders.

FLAIL MOWERS

Flail mowers are ideal for efficient cutting and mulching of vegetation and overgrowth for both commercial and residential properties.

FORKS—FORESTRY

Several fork types are available for heavy-duty forestry and millyard applications. Logging, millyard, grapple and lumber forks are available for loading and unloading trucks, decking and feeding the mill, plus handling and sorting lumber, logs and palletized materials.

FORKS—PALLET

Many pallet fork sizes are available to equip the smallest to largest machines for handling all types of materials. From bulky, palletized material found on most every construction site to bagged fertilizer and seed on landscaping and nursery sites—pallet forks provide some of the best versatility.

FORKS—PIPE AND POLE

This purpose-built fork is designed for use on wheel loaders in oil and gas field drilling, pipeline construction and utilities work. The two-piece top clamp holds pipe from two to 36 inches in diameter. Clamping surface has rubber contact pads to protect pipe from damage.

GRAPPLES—CONTRACTORS

This grapple style is strong and durable, equipping hydraulic excavators for structural demolition, handling, sorting, loading and unloading rock, scrap, pipe, waste material and other debris. The lower jaw is slightly curved and enables easy loading, more penetration into scrap debris, and unrestricted release of material when unloading.

GRAPPLES—DEMOLITION AND SORTING

It's easy for an excavator operator to precisely position this grapple to move scrap and demolition debris with its 360° rotation. Powerful grab force and fast cycle times ensure high productivity when taking down a building or sorting and loading material.

GRAPPLES—FORESTRY

Forestry grapples for forest machines feature 360° rotation and can be quickly positioned for maximum productivity. Cat Forestry Grapples are built using high-strength steel throughout the body and tines, reinforced in key areas to maintain structural integrity. Available in a wide range of sizes.

GRAPPLES—ORANGE PEEL

Continuous 360° rotation gives material handler operators full control to position the grapple swiftly and precisely in scrap and other materials. A covering guard facilitates easy access to the cylinders, which are housed within the tines for maximum protection. Choose from 4- or 5-tines in range of capacities sized for use with small and medium material handling excavators.

GRAPPLES—TRASH

These grapples are wide and feature a 4-over-5 tine jaw construction making them ideal for excavators quickly handling and moving large volumes of municipal solid waste, wood chips, wood debris, and other low-density material.

GRAPPLE BUCKETS, FORKS AND RAKES

Grapple buckets, forks and rakes are designed to handle bulky materials. They are built for compact track and skid steer loaders, compact wheel loaders and telehandlers. Utility grapple buckets, forks and rakes handle light materials while industrial grapples are best for heavy-duty usage.

HAMMERS

Cat Hydraulic Hammers make short work of your demolition, construction, quarry and production breaking needs. A sealed, sound-suppressed housing protects the power cell and significantly reduces sound levels on silenced models. A variety of sizes and tool options make Cat Hammers the ideal choice for concrete demolition, breaking rock and frozen or hard ground, and trenching.

LIFT GROUPS

Balderson Parallel Lift Groups enable Cat® Motor Graders to engage a variety of front-mounted attachments such as plows, V-plows and straight blades, adding to the machine's versatility and on-the-job performance.

MATERIAL HANDLING ARMS

These tools equip Cat Loaders and Telehandlers for moving, manipulating and placing pipe, precast concrete structures, small equipment and other similar items with maximum visibility and control. They are well suited for loading, carrying and setting trees and large shrubs in landscaping.

PETERSON

WORK TOOL ATTACHMENTS

MULCHERS

For high performance cutting and mulching of vegetation and undergrowth from typical wooded terrain—these attachments reduce trees, saplings, and shrubs into mulched material. The Skid Steer and Compact Track Loader-based heads can process trees up to 8" diameter, providing effective solutions for land management projects. These rugged heads can also incorporate the mulch and nutrients into the soil, reducing erosion.

MULTI-PROCESSORS

A multi-processor equips your excavator for even higher levels of demolition versatility. Consisting of a housing and jaw set (with six jaw options available), it offers the flexibility to choose the right jaw set for cutting and crushing most any material and scrap on demolition jobsites.

PULVERIZERS

Secondary pulverizers fine crush concrete and concrete blocks resulting from site demolition. Wide jaws with pick-up tips and numerous teeth, a large opening, reversible cutting edges and rapid closing time help reduce the largest amount of on-site concrete in the shortest time.

QUICK COUPLERS

Cat Quick Couplers increase the machine's flexibility and versatility by enabling rapid changeover of work tool attachments—keeping a single machine highly productive. Quick Couplers are available for loaders, excavators and backhoes.

RAKES—LANDSCAPE

This rake style uses hardened teeth to pulverize, aerate, level and condition the soil—while collecting and depositing rocks and debris into an integrated hopper bucket for quick removal. These rakes are designed to operate with the loader in reverse, leaving the soil finely groomed with minimal compaction.

RAKES—LOADER

Cat Loader Rakes feature fabricated steel teeth for strength and a long service life in land clearing, stump removal, and boulder and large tree moving. Heavyduty styles with shorter teeth and more robust designs are ideal for working in clay and other heavy soils. Rakes are available with or without a top clamp.

RAKES—POWER BOX

This one work tool for compact track loaders, wheel loaders and skid steer loaders de-thatches, removes old lawns and weeds; grades, levels, rakes, removes debris; and prepares seedbeds. Angling ability enables the operator to windrow debris for easy pickup and removal.

RIPPERS

With its powerful, single point of penetration, Cat Rippers are effective at breaking out rock and other difficult materials. Using it with a compatible quick coupler and rock bucket for "rip and load," you can supplement or even eliminate blasting rock prior to truck loading.

ROTORS

Caterpillar offers a wide variety of sturdy rotors for reclaimers and milling machines. Designed and built to precisely match the Cat machines they're mounted on, they maximize efficiency, enhance productivity and ensure longer service life.

SAWS

Wheeled saws are designed for high performance trench cutting on a variety of hard or compact surfaces like asphalt, reinforced concrete and rocky or frozen ground. They are compatible with compact track loaders, skid steer loaders and compact wheel loaders.

SCARIFIERS

Scarifiers are designed for a wide variety of ground-preparation applications. These attachments are available for Cat Motor Graders.

SHEARS

Cat Shears are designed for Cat machines—taking full advantage of the hydraulic flows and pressures to enhance productivity without compromising safety or causing premature wear of the shear and carrier. Mobile scrap and demolition shears can be boom-mounted, or stick mounted with or without a coupler.

SNOW BLOWERS

Cat Snow Blowers utilize a two-stage auger and impeller design to move a greater volume of snow quickly and efficiently. Compatible with Compact Track Loaders, Skid Steer Loaders, and Compact Wheel Loaders. Cat Snow Blowers are designed for removing snow from streets, parking lots, driveways and sidewalks.

SNOW PLOWS, PUSHES AND WINGS

Whether on urban, rural or mountain roads, at airports, plant facilities, parking lots or clearing ditches, Cat Snow Plows, Snow Pushes and Snow Wings move snow with maximum efficiency and power. Snow Wings, one-way, reversible, angle and V-plow styles equip your Cat Loaders and Motor Graders for high-volume snow removal.

STUMP GRINDERS

Designed to economically remove stumps in residential, commercial and agricultural settings—Cat Stump Grinders offer increased production compared to tow-behind grinders in situations where multiple stump removals are required. They are compatible with compact track and skid steer loaders, and compact wheel loaders.

THUMBS

Thumbs work in conjunction with excavator buckets, enabling the machine to pick, sort, stack, load and move various materials found on the jobsite. Pro Series Hydraulic Thumbs move and rotate with the bucket through the bucket rotation cycle. Rigidlink thumbs are a low-cost, effective solution in which the thumb is manually moved to one of two working positions.

TILLERS

Tillers are designed for breaking up and pulverizing soil, mixing compost or other material into existing soil, stabilizing and leveling existing terrain in landscape-finishing applications. Cat Tillers are compatible with compact track loaders, skid steer loaders and compact wheel loaders.

TRENCHERS

Cat Trenchers are designed for use on compact track loaders, skid steer loaders and compact wheel loaders—enabling these machines to cut narrow straight trenches in soil for laying electrical, telephone and cable lines, and water and gas pipe.

TRUSS BOOMS

Truss booms for telehandlers are designed to lift and place items like roof trusses, frames, beams as well as equipment. The truss boom, with its added horizontal and vertical reach, enables operators to place materials and equipment in hard to reach areas.

WINCHES

Cat Retrieval Winches are built for easy installation on small dozers and are designed to handle various winch applications requiring high line pull and smooth speed modulation. They offer superior versatility and are ideal for dozers used in utility and retrieval type jobs.
