

BECOME A TRANSFORMATIONAL SAFETY LEADER

TWO DAYS. TWO WORKSHOPS. ONE EXCLUSIVE OPPORTUNITY.

Peterson Cat customers are invited to an exclusive Caterpillar Safety Services event focused on strengthening safety leadership and hazard analysis skills. Attend one or both workshops based on your interests and organizational needs.

OCTOBER 07 MINDSHIFT FOR LEADERS

Introduces Human and Organizational Performance principles as a framework for understanding how systems and leadership influence safety outcomes.

KEY TAKEAWAYS

- Clearer context for understanding error and safety events
- Shared language for discussing error without defaulting to blame
- More effective leader conversations that support post-incident learning
- Greater psychological safety for sharing concerns, mistakes, and challenges

OCTOBER 08 SITEREAD

Builds practical hazard analysis skills to recognize changing conditions, identify high-energy hazards, and apply controls to reduce risk in dynamic work environments.

KEY TAKEAWAYS

- Improved recognition of increasing risk exposure
- More robust safety conversations that help identify risk
- Stronger selection and application of safety controls
- More informed risk decisions as conditions change

WHO

Operational, senior safety, and learning & development leaders

WHEN

October 07–08, 2026
8:00 a.m. - 3:00 p.m. PST
